EXPERIENCE & EDUCATION

OCT 2026 – NOW

Founder, FrameRelay Studio

A motion studio for software teams. I built its site, film pipeline, pricing, and intake.

- framerelaystudio.com: a painted WebGL2 world with four quality tiers and a frame-time governor.
- 23 Remotion compositions, rendered in 16:9, 1:1, and 9:16 and cut to measured musical beats.

2024 – NOW

Programmer / Developer, Tata Consultancy Services (TCS)

Development work that includes quality management and review, alongside independent product work.

2024 – NOW

Independent product engineer, Self-directed

Designed, built, and shipped six products end to end across web, mobile, and AI, most with a live demo and public source code.

- Mirror: an Expo app, a Next.js admin, and a FastAPI AI service sharing one Supabase database, with 39 Python tests and row-level security.
- BidStrike: real-time auctions over Socket.io, with server-side bid validation and proxy auto-bidding across 26 API routes.
- This portfolio: mobile Lighthouse performance raised from 50 to 90+, guarded by performance budgets in CI.

2023

BSc (CAS), Panjab University

SKILLS

LANGUAGES	TypeScript · JavaScript · Python · SQL
BACKEND	Node.js · Express · FastAPI · Socket.io · REST APIs
QUALITY & DELIVERY	Quality review · Vitest · Jest · Playwright · GitHub Actions · Docker · Vercel · Cloudflare Workers
AI	Gemini API · OpenAI API · Prompted workflows with fallbacks
FRONTEND	React · Next.js · React Native / Expo · Tailwind CSS · Accessibility
DATA	MongoDB · PostgreSQL / Supabase · Row-level security
MOTION	Three.js / WebGL2 · Remotion · Scroll-driven CSS animation

SELECTED PROJECTS

BidStrike

Bidding only works when everyone sees the same price. I built live auction rooms, proxy auto-bidding, and dashboards for bidders and sellers.

26 API ROUTE HANDLERS · 14 AUTOMATED TEST CASES · 4 REAL-TIME SOCKET EVENTS

Live: bid-strike.vercel.app
Source: github.com/MrUnknownji/bid-strike

Mirror Wallpapers

AI wallpapers need curation as well as creation. I built paired mobile previews and an admin console for approval, credits, and generation costs.

3 APPS: MOBILE, ADMIN, AI SERVICE · 39 PYTHON TESTS · 14 SQL MIGRATIONS

FrameRelay Studio

The motion studio I founded and run. Its site is a hand-painted WebGL world that lowers its own quality on slower phones, and every product film is written as code.

23 REMOTION COMPOSITIONS · 4 QUALITY TIERS, CHOSEN PER DEVICE · 7 CONCEPT FILMS ON THE LIVE SITE

Live: framerelaystudio.com

OmniMart

Shopping needs discovery and checkout to work together. I built product browsing, cart and checkout flows, and admin screens for catalog and orders.

25 APP PAGES · 3 SURFACES: STORE, ACCOUNT, ADMIN

Live: omni-mart-orpin.vercel.app
Source: github.com/MrUnknownji/omni-mart
